Excellent for Special Ed

By sunny

I used this for high school special ed biology. The regular HS text was so complex and huge and would have been like writing a new book to break down for kids in special ed...this book was simple, concise, and covered the right material. I supplemented with my own stuff. Worked great.

Biology by AGS publishing company

By dogloverx5

A good Biology text to use with students who have reading difficulties. Since the book is "basic" I would encourage supplementing the material with online and other resources.
