This Second Edition continues the fine tradition of its predecessor by exploring the various automatic control systems in aircraft and on board missiles. Considerably expanded and updated, it now includes new or additional material on: the effectiveness of beta-beta feedback as a method of obtaining coordination during turns using the F-15 as the aircraft model; the root locus analysis of a generic acceleration autopilot used in many air-to-air and surface-to-air guided missiles; the guidance systems of the AIM-9L Sidewinder as well as bank-to-turn missiles; various types of guidance, including proportional navigation and line-of-sight and lead-angle command guidance; the coupling of the output of a director fire control system into the autopilot; the analysis of multivariable control systems; and methods for modeling the human pilot, plus the integration of the human pilot into an aircraft flight control system. Also features many new additions to the appendices.

- Sales Rank: #1584265 in Books
- Brand: Blakelock

Five Stars

By Junfeng Yang

This book is one of the most classic text in flight control

3 of 5 people found the following review helpful.

The reference book to have for missile simulation

By A Customer

I used this book as a ready refence for all my six degree-of-freedom missile modeling. An excellent presentation. There are 13 chapters with 9 Appendices. I suspect this book is out-of-print - get it while you can!

2 of 3 people found the following review helpful.

Automatic Control of Aircraft and Missiles by J H Blakelock

By A Customer

Blakelock's text is a very fine book. You may also find Control Systems Engineering by Nise (now in 3rd Edn)of benefit.
