Clarke has served in the White House so his expertise in counterterrorism brings a sense of reality to what might have been just another technothriller showcasing the military and its high-tech weaponry. A drone is utilized on a Kill Call and explodes over its target successfully. But a survivor demands justice and is able to use his connections to put targets on the operators of the drones. Remote operators used to watching events thousands of miles away are suddenly being picked off one by one. Clarke does a terrific job showcasing how the drone program works and revealing something about the men and women behind the scenes who use the machines. Readers who enjoy learning about technology but who don't mind that the characters are secondary will eat this up. Clarke's name alone will guarantee some demand. --Jeff Ayers

Interesting Ideas, Wooden Storytelling

By Kevin Joseph

Richard Clarke's *Sting of the Drone* is a fictionalized examination of the Obama Administration's use of remotely-piloted aircraft (commonly referred to as drones) as our preferred way to eliminate potential terrorists around the world. To Clarke's credit, he provides a fairly balanced look at the arguments in favor of and against this program, letting the reader decide whether the global war on terrorism is an end that justifies what amounts to targeted assassinations of those perceived to pose a threat to U.S. interests.

As is often the case in these types of novels, however, the characters, plot and setting seem to exist only as a way to help frame the author's arguments and showcase insider knowledge. The choppy chapters, constantly flitting between viewpoints of multiple characters, also prevent the novel from developing an effective flow and make it difficult to form a bond with any of the protagonists.

So five stars for the ideas and fascinating insider details, two stars for the storytelling, resulting in a three-star overall rating.

Decency is a more exhausting state than its opposite

By michael a. draper

Readers curious about the U.S. Predator program can get an insider's look with this dandy novel. The book explodes with action as Clarke describes the leading pilots of the drones and the intelligence personnel who run the program.

There has been such success with drone strikes that one of the Arab leaders calls a meeting. He is the leader of the Qazzani Cartel who deal in heroin, weapons, gold and electronics. They also enjoy killing Americans.

They have a two fold plan which is to happen at Christmas time. On one hand bombs will go off in key American cities, in the other, with the help of Ukrainian computer hackers, they will strike against the drone pilots and destroy drones on the ground.

Clarke details the successes of the drone program but also conveys the bad publicity that sometimes occurs. He also describes the meetings in Washington where suitable targets are chosen.

He demonstrates how friendly countries have benefited from the drones taking out terrorist who had planned to take actions to destabilize the governments. This is so successful that the Cartel devises a way to set up a drone strike that made it look like the US doesn't care about the innocent lives lost.

The leaders of the drone program also have to deal with politicians who have forgotten what happened on 9-11 and want to curtail drone activity. Intelligence personnel object to this and feel that it's the best program we have.

This action based novel shows good suspense as we follow the activities of the terrorists as they take actions in the days prior to Christmas and we wonder how the terrorists can be identified and stopped.

Great premise from a talented author

By SarahSmith

I received an ARC from the publisher in exchange for an honest review.

First off I have to say this story had so much promise and I was very interested to read it. I have heard great things about Richard A. Clarke, even though I have not yet read anything by him, and was very eager to read one of his works. That said I can only give this 3 stars (2.5 if this was allowed). The idea of the story was very interesting and relevant and hooked me from the excerpt, unfortunately the narrative style and the sheer number of characters introduced throughout the book had me losing interest. The narrative style did not instill any connection to the characters or events for me. The amount of characters introduced throughout the book was also problematic for me, it was hard to keep them all straight. I was about 1/3 of the way through the book before I really started to feel like the story was grabbing me, but again with the narrative style and the numerous characters it was hard to hold my interest.

The last few chapters were amazing though, and that's why I gave this book three stars. The ending was very well done and thought provoking. The hairs on the back of my neck stood up with the possibilities of what could/will/might happen. If you're already a fan of Richard A. Clarke you will most likely love this. Unfortunately for me this was just not my cup of tea.
