Sadly nothing new - Reprint of earlier Brian Long Miata books (which are great...)

By Jac Cottrell

Inside page states that this was originally published as 'Mazda Miata: Renaissance Sportscar' in 1998 and later as 'Mazda MX-5 Miata - The book of the world's favourite sportscar'. Doing a quick spot check between the books, they share the same headers, content and photos. I noticed that a few things have been slightly updated, moved around. A little disappointing that they are giving this a new cover and title...no wonder there is no option to 'Look inside'.

This version removes the NB (99-05) and NC (06+) content to deliver only the NA (89-97) material. As of August 2015 Renaissance Sportscar can be found for a reasonable price, the second book has shot up a bit. Having both, I recommend "The book of the world's favourite sportscar" - it covers all of the NA and NB development and lifecycle, as well as the development of the NC.

This new book has an excellent cover shot showing a stunning Classic Red with the barn doors up (it sucked me right in...), but Renaissance Sportscar gives you more content for less cash.

To my professional graphics eye, the print and photo quality of this version is not as good as my copy of Renaissance Sportscar. The photos in the new book have much more contrast, and seem to be a lower quality - even though they are the same images in both books. (Maybe someone misplaced the Zip disk from 1998 that had the high-res images...)

-----

By now you may have figured out I am passionate about the Miata...these little cars are contagious. So, I should have known that there can't be too much more to dig up on this topic. Shame on me.

Now that I have slammed the book for being a reprint...I can tell you that the content is excellent. I have grabbed Renaissance Sportscar to flip through more times than I can count. If I did not already own the earlier versions this would be taking up a spot on the Miata bookshelf.

-----

If you want a beautiful set of books on the first generation Miata, track down the boxed set "Miata: Mazda Mx-5 Hardcover" by Jack K. Yamaguchi and Photographer Haru Tajima. Released the same time as the first cars, this is some of the best in print on the early Miatas. The content is excellent, and yes, some of the photos are the same as the Long books. But the second book is basically a coffee table picture book filled with amazing shots of the very first NA's. This is pre-interweb publishing, folks...you just can't get away with that type of indulgence today!
